| 4 | Barriers | Notes |
| 5 | There exists strong city environmental programs branding so it may be difficult to include ReThink Disposable initiatives. Also, Surfrider West Los Angeles/Malibu Chapter implement an Ocean Friendly Restaurant Program in this city so there may be a saturation of similar programs. | <ul style="list-style-type: none"> - Has a strong Office of Sustainability and Environment with multiple programs - Sustainable City Plan has Sustainable Food Commitments, one of which is to reduce packaging and recycle food waste - City also has a Non-Recyclables Food Service Container Ban (no polystyrene) & a Plastic Bag ban |
| 6 | | <ul style="list-style-type: none"> - Recently passed a Polystyrene Food Service Ware Ban & has an existing Plastic Bag ban |
| 7 | | <ul style="list-style-type: none"> - City has a Polystyrene ban https://www.malibucity.org/index.aspx?NID=292 & a Plastic Bag ban |
| 8 | | <ul style="list-style-type: none"> - City has a Polystyrene Food Service Ware ban: http://www.hermosabch.org/index.aspx?page=719 & Plastic Bag ban |
| 9 | | <ul style="list-style-type: none"> - City has a Polystyrene Food Service Ware ban: http://www.citymb.info/city-services/public-works/polystyrene-ordinance-and-bring-your-own-campaign .. Enforcement is carried out through fines (\$100 for each violation within one year) & has a Plastic Bag ban |
| 10 | | <ul style="list-style-type: none"> - City has a Sustainability Plan, with a note to "Support Sustainable Businesses and Services... with over one thousand employees and an operating budget of over \$200 million, the City of Inglewood can use their purchasing power to encourage businesses to offer goods and services with better environmental performance, and to purchase products from distributors and manufacturers with a high level of social and environmental responsibility..." City also has goals to produce less waste. However, there is no PS ban in place. - TBF is working more closely with restaurants (3) in this city and Social Justice Learning Institute to carry out a restaurant composting pilot project, the compost site is located at the Environmental Charter Middle School - Inglewood |
| 11 | Wasn't interested in joining CBC, but RD may appeal to him | <ul style="list-style-type: none"> - City has a Polystyrene Food Service Ware ban and has noted enforcing it "has been a challenge" - has a Plastic Bag ban |
| 12 | | <ul style="list-style-type: none"> - SBEC's mission is to enhance and cultivate environmental programs through collaboration with local agencies, businesses, and individuals. Despite them being an organization, they have influence in the South Bay govts. and would be passionate about RD |
| 13 | | <ul style="list-style-type: none"> - Sodexo (dining provider) has a "Better Tomorrow" plan with goals to protect and restore the environment |

| 3 | |
| 4 | Significance |
| 5 | City known for being early adopter of environmental measures and influencer for what other cities do. |
| 6 | New polystyrene ban will require support from organizations to enforce and educate, so may be good timing to start something in this city now. |
| 7 | City staff is very supportive of our environmental initiatives and would most likely dedicate some of their time to make this happen. |
| 8 | Supportive city staff to help us and they need support in enforcement and education of their bans. |
| 9 | Supportive city staff to help us and they need support in enforcement and education of their bans. |
| 10 | This city and all of South L.A. deal with many health and environmental hazards. Efforts that promote environmental initiatives play such a parallel role in also promoting social and health equity. It would be awesome to expend our efforts in this area of LA. |
| 11 | Helping this city could open up their mind to CBC. Lot's of potential here. |
| 12 | Not sure how this would play out, but if we got SBEC on board, we could have a huge reach across multiple cities. |
| 13 | Big impact |
